

# 700 *series*

## The 700 Series | 710 | 712 | 760 | 770 | 780 | 790

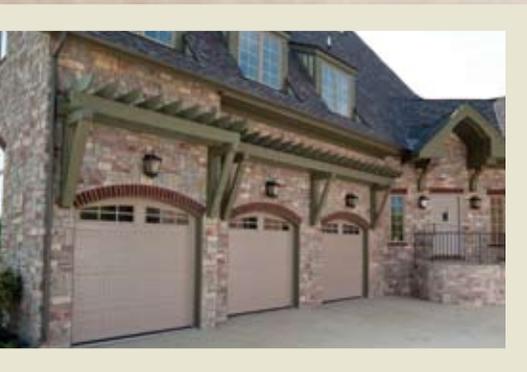

The 700 Series is our premier line of garage doors. The 700 Series offers the look of deep embossed wood grain with the strength and durability of heavy gauge galvanized steel. The 700 Series boasts one of the highest energy ratings of any garage door in the industry, insulated for maximum energy efficiency and engineered for years of use. Backed by a Limited Lifetime Warranty, the 700 Series is ideal in all climates and offers a full range of color and window options. Adding beauty and value to your home has never been so easy!

R Value  
16.18

## Technical Information

The **700 Series** is offered in 12 pre-finished colors. This series provides maximum energy efficiency with **1<sup>3</sup>/<sub>4</sub>" thick**, CFC FREE, polyurethane insulation with a calculated R-Value of 16.18, resulting in doors that provide more than six times the insulating value of wood or non-insulated doors. The 700 series includes a three-tier, corrosion-resistant protective finish with a polyurethane primer and a durable polyester finish coat on the interior and exterior. A vinyl top cap and bottom cap provide a **full-thermal break**, separating the outside steel from the inside steel. Included is a heavy vinyl bottom weather seal. This combination of protection seals out the elements and repels the most hostile weather conditions. See our Window Option literature for all the window and glass options. The 700 Series is also available in a wide range of design pressures for wind load requirements.
